Professional Summary

B.Tech Computer Science Engineering (Cyber Security) student with strong foundations in Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, and Computer Networks. Proficient in Python, C, Java and SQL. Passionate about software development and problem solving with hands-on experience in developing data-driven applications.

Education

B.Tech in Computer Science Engineering (Cyber Security), <i>SRM Institute of Science and Technology</i> CGPA: 8.48/10	2023 – 2027
Intermediate (MPC), C.V. Raman Junior College 97.3%	2021 – 2023
Class X, Sri Saraswathi High School 71.2%	2020 – 2021

Technical Skills

Programming Languages Java, Python, C,SQL	Core Subjects Data Structures Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks
Technologies Git, GitHub,PowerBI,Tableau,Numpy,Pandas ,matplotlib,MySQL,	Concepts Cloud

Certifications

• Data Structures and Algorithms – Coursera	• Introduction to Artificial Intelligence – Coursera
• Neo4j Certification	• Oracle cloud infrastructure

Achievements

- Coding Problems Solver, CodeTantra and other platforms**
Solved 200+ coding problems across leetcode,hacker rank and code tantra
- SRMJEEE Scholarship**
Worth INR 30,000.
- Academic Achievement**
Maintained a CGPA of 8.46/10.
- AIR 13825, NCAT**
The test is among 3,00,000 students

Coding Profiles

- GitHub**
Active contributor with projects focused on Software Development and Machine Learning.
- CodeTantra**
Regularly solving coding and Data Structures Algorithms problems.

Projects

VEERA AI- Intelligent Voice Assistant

Developed a Python-based AI voice assistant with wake-word detection, speech recognition, and natural language processing for hands-free interaction.

Integrated Gemini AI and desktop automation features to perform tasks such as answering queries, launching applications, web searching, and taking screenshots through voice commands.

Implemented fuzzy command matching, modular architecture, and command logging to improve recognition accuracy, system reliability, and user experience.

Climate Trend Analysis and Forecasting System

- Built a climate analytics system using historical environmental datasets.
- Performed trend analysis, forecasting, and visualization using Python and Matplotlib.
- Generated insights for future climate pattern prediction.

Sales Data Analytics Dashboard

- Developed an interactive dashboard using SQL and Power BI.
- Created KPI reports for revenue analysis and business insights.
- Automated reporting workflows and performance tracking.
